

In the 5.4 release of ALICE, administrators have new tools to manage their ALICE systems, keep staff members more connected, and help ensure guests have stellar visitor experiences.

WHATS NEW?

- > Configure check-in processes through the cloud configuration portal
- > Create and manage registered visitor QR codes for long-term guests
- > E-mail guests signed documents after their visit
- > Send slack notifications to employees when a visitor check-in with them

Learn more about the new admin features by contacting your ALICE Representative.
