

Improve your visitor experience with ALICE's new pre-check-in option. Guests can now fill out and review check-in information before their visit by using a web browser on their PC or mobile device. This allows your visitors to review key policies - such as mask mandates - before arriving, or simply allows them to save time by reviewing materials during their commute to your office.

WHAT CAN GUESTS DO WITH PRE-CHECK-IN?

- > Verify personal information
- > Answer questionnaires
- > Sign PDF documents such as non-disclosure agreements or office policies
- > Review induction videos
- > Read additional information or review policies about their visit

Enterprise license customer using the ALICE Cloud database can update their software to 5.4 to access all new features. Don't have an Enterprise license? Contact your sales representative about upgrading your subscription.
